

# Panel Builder

## Summary:

Webb-Stiles Company is seeking an experienced Electrical Assembler to wire control panels based on blueprints and schematics while performing occasional maintenance on building and shop equipment. This role supports the production and maintenance of our custom material handling solutions, ensuring reliable electrical systems for a variety of applications. The ideal candidate will work closely with the team to maintain safety and efficiency in a fast-paced, shop environment.

## Responsibilities:

- Read blueprint/schematics from engineering to wire a control panel
- Occasional building maintenance
- Occasional Shop equipment repair/maintenance

## Required Qualifications:

- Must be able to take a blueprint/schematic and wire up a control panel
- Electrical Assembly
- Knowledge of controls, how to land and terminate wiring
- Be able to read electrical drawings
- Basic ability to terminate wiring in junction boxes
- Experience with voltages up to 480v, 3 phase

## Preferred Qualifications:

- Programmable Logic Controller (PLC) experience is helpful

## Skills & Competencies:

- Ability to read electrical drawings (blueprints/schematics)
- General knowledge of hydraulics
- General knowledge of pneumatics

## Work Environment/Physical Requirements:

This is an in-office position, working in a shop setting. Employees will be expected to stand for extended periods and work collaboratively with others. The role requires adaptability and teamwork to ensure tasks are completed efficiently in a dynamic, fast-paced setting. Safety protocols must be followed at all times to ensure a secure working environment.

## Salary Range/Pay & Benefits:

\$25-\$30 per hour based on experience

Webb-Stiles offers competitive benefits, including health, dental, 401k, profit sharing, paid holidays, and vacation time.
